No. 8 Vol. IV

Irma, Alberta, Canada, Friday, April 16th 1920

\$1.50 Per Year in Canada; Foreign Countries \$2.00

LOCAL NEWS

The Ladies of Mrs. Gray Miss Tilley returned from a visit to Edmonton. Miss Simmons was a visitor to Wainwright Thursday. Monday was a "wet" day in town. Where was the police? Mr. J. G. Clark left on Wednesday for Greenshields looking for feed.

C. P. Larson has hooked a chopper onto his tractor and is grinding oats back of the Ford garage to help the feed situation.

We have a couple of compositions from pupils in Sunny Brea school that we will publish in next week's issue.

Steamship tickets may now be had to Europe and all information regarding rates and sailings may be obtained from local G.T.P. agent.

P. Garney, of Montana, has purchased the NE Sec of 35-45-9, and will be moving his family on same soon.

J. W. Stuart and family have returned from spending the winter in California. Mr. Stuart is crying a sale for Mr. H. Marshall on Fri. April 23rd.

Mr. R. Williamson was in town this week and rented his farm to Mr. Loss. Mr. Williamson will work his father's farm at Fort Saskatchewan.

Mr. and Mrs. O. Wermund and their son arrived in Irma Sunday direct from Denmark. Mrs. Wermund is a sister of Mrs. Hostrop. They intend spending the summer with Mr. and Mrs. Hostrop on their farm west of Irma.

U. F. A.

A U. F. A. meeting is called for Saturday afternoon at 2 o'clock. Every member ought to be present as the business is very important. The question of business incorporation will be discussed. The UFA have a line on baled wheat straw but are not in a position to ship in a quantity and not dispose of it. If any one wants this straw we would be glad to help them out but we must know how much very promptly. We have also a small quantity of oat straw promised. See the Secretary or H. W. Love acting for the Commercial Committee.

Curlman Children Sick.

Cecil Curlman, age 10, was operated on at the Royal Alexandra hospital January 26th. A few days later he caught the measles and was removed to the isolation hospital. For three weeks small hope was held out for him. On April he was taken to his home at Calder, West Edmonton, where he is rapidly gaining strength. Arthur Curlman had measles the 1st of February and left him in very poor health. On March 27th was moved to the Isolation hospital for scarlet fever but is now back to normal after a bad attack of rheumatism.

Homesteader Dies.

The sudden death of William R. Clark, a homesteader the Manville district, has been reported to inspector Piper, of the Edmonton division of the Alberta Provincial police. According to report submitted by Constable F. R. Lieth, deceased was found dead in his shack about eight miles south of Manville and had apparently died while in sleep.

Carl and Bessie Burr Married.

On Friday April 9th a quiet wedding occurred when Mr. Carl Burr was married to Miss Bessie Burr both of Irma. The ceremony was held at the Grace Methodist church parsonage Edmonton. Rev. W. E. MacNiven officiating. We join with the many friends of the happy couple in wishing them a long and prosperous journey through life.

Eggs One Dollar Each?

The price of eggs have been high but those who read H. A. Clute's advertisement last week got a jolt that made them sit up and wonder if they would have to eat eggs off their breakfast bill-of-fare forever. Yes, it was a printer's mistake and we hasten to correct it. The item stating that Eggs from Pen No. 1 were 15 for \$15.00, should have been 15 for \$5.00. All interested take notice.

Sunday Services.

11.00 a.m. Preaching service at Orbindale.
3.00 p.m. Preaching at Roseberry.
3.30 " at Alma Mater
7.30 " at Irma
Sunday School
Irma 11 a.m.
Roseberry 2.00
Alma Mater 2.30 pm.
C. G. Hockin, pastor

Mr. J. W. Allen, of Strome, was in town Tuesday. Mr. Allen has bought the W 1/2 sec 26-45-8 north-west of Orbindale and intends moving on same as soon as weather permits. Mr. Allen would like to rent some improved land in this district so as to be able to put in a crop before he starts breaking on his own land.

Sunny Brea School Report for March

for the month of March.
No. of days school was open during March 23. Percentage of attendance 86. Number of late 2. Perfect attendance during the month, Eric Richardson, Georgina Fenton and Earl Lennon.

Canada's and the World's Need

Occasions arise when it becomes the patriotic duty of every man, and woman, too, to forget, neglect, even sacrifice, their own work and interests for the general good of their country. Such an occasion arose with the outbreak of the Great War. The happiness and comfort of home, success in business achievement, the general betterment of one's position in life and the promotion of the family's welfare, usually and properly the chief worldly concern of any person, suddenly became matters of minor importance. The liberty of the whole human race, the basic principles on which civilization rests, the ideals and independence of the nation itself, were jeopardized and their destruction threatened. In these circumstances, one's devotion to purely personal interests became utterly selfish and unworthy.

Generally speaking, a man serves his country and the cause of humanity ably and well when he devotes his best thought and energies to the every day work which calls for attention, providing the work in which he is engaged is legitimate and worthy. It should not be, of course, a selfish absorption in his own interests to the exclusion of everything else. It should not be a miserly regard for personal gain irrespective of the effect on others, and wholly neglectful of the finer things in life and of community and national interests. But, on the whole, the person who does his work faithfully and well is serving his country and fellowmen at the same time.

This, let it be repeated, is true as a general proposition, but it was never more universally true than it is at the present time. The needs not only of Canada, but of the whole world, the needs of that civilization which was saved from destruction on the battlefields of the world during the historic years 1914-1918, call imperatively to every Canadian to "be on the job" doing his own particular work at this time.

There is no need for emphasizing this fact because there is in evidence on all sides an inclination to "let up," to put less effort into one's work, in a word, to get through the day as quickly and easily as possible, and this at a time when, because of the whole-sale destruction of goods and wealth caused by the war, there is greater need than ever before for a maximum of productive effort. As has been pointed out over and over again, not only do men insist upon easier work, shorter hours of labor, more pay and more of the good things of life, but they become indignant if the price of these goods goes up. Yet it must be apparent to all intelligent and reasonable men that if less is produced and more is consumed scarce must result and a rise in prices becomes as inevitable as the force of gravity.

This general relaxation is, however, a natural sequence of the war, and it is not confined to any one class of the population of this and other countries. It is manifest in all ranks of society. During the war there was a tremendous urging of farmers to work early and late and increase food production, and of all industrial workers to turn out a maximum of goods. This same incentive to effort was urged in connection with the Victory Loan, Patriotic Fund, Red Cross, and other drives. It found general expression in work, service, sacrifice. Everybody was living at high tension.

It is inevitable and only human nature that such a strain, for which many were ill-prepared, should be followed by a reaction, and that with the relaxed tension there should come a period of slackness, lessened production and lack of interest in work. It is the same feeling which forces a man after a period of tense activity to take a holiday. The war saw an extreme of work and sacrifice; now we are having an extreme of slackness and selfishness, wherein everybody wants as much as possible by giving or paying as little as possible.

But along this path lies individual and national loss and, if persisted in, ultimate disaster. If we all look upon the world as our orange to be squeezed dry, at a time when a desperate struggle is in progress to rehabilitate it, then we are but hastening our own disappointment and increasing our loss. On the other hand, the man or woman who refuses to let themselves down, and who sticks to their job now will find in a comparatively short time that they have not only rendered real service to their country and the world, but that they have enormously advanced their own interests and placed themselves in a strong position to meet and overcome any of the adversities which may yet have to be faced before this old world is again established on a normal foundation.

A new broom sweeps almost as clean as a straight flush.

GIRLS! DRAW A MOIST CLOTH THROUGH HAIR

Let "Danderine" save your hair and double its beauty.

Oh, girls, such an abundance of thick, heavy, invigorated hair; a perfect mass of wavy, silky hair, gloriously fluffy, bright and so easy to manage.

Just moisten a cloth with a little "Danderine" and carefully draw it through your hair, taking one small strand at a time; this magically removes all dirt, excess oil and grease, but your hair is not left brittle, dry, stringy or faded, but charmingly soft, with glossy golden gleams and tender lights. The youthful glints, tints and color are again in your hair.

"Danderine" is a tonic-beautifier. Besides doubling the beauty of the hair at once, it checks dandruff and stops falling hair. Get delightful Danderine for a few cents at any drug or toilet counter and use it as a dressing and invigorator as told on the bottle.

Among many people sneezing is interpreted as a sign of evil fortune. By many it was once believed to be lucky from noon to midnight and unlucky from midnight to noon.

The price of tea and coffee has been shooting up—but that doesn't bother the thousands who now enjoy

INSTANT POSTUM

a rich full-bodied and wholesome beverage with distinctive coffee-like flavor but only one after effect—

Satisfaction At Grocers

No Raise In Price

Britain's Debt to Canada

\$214,684,439 Due to This Country By The British Government

The Ottawa correspondent of the Toronto Globe says that "Recently the Imperial government and Dominion government struck a balance of their indebtedness to each other, apart from certain accounts still under consideration. The federal government's indebtedness to Great Britain, with the exceptions noted, was therefore wiped clean off the slate, leaving an amount of \$214,684,439 due to this country by the British government."

"During the war Great Britain paid the expenses of feeding and providing munitions to Canadian troops, while in Canada the Dominion government looked after paying for all munitions and a large part of the foodstuffs obtained on British account in this country. There have been previous adjustments. The last adjustment concerned an amount of \$251,976,738 owing by Canada to the British government, and a total amount of \$466,661,177 owing by the British government to the Dominion government."

THANKFUL MOTHERS

Once a mother has used Baby's Own Tablets for her little ones she would use nothing else. The Tablets give such results that the mother has nothing but words of praise and thankfulness for them. Among the thousands of mothers throughout Canada who praise the tablets is Mrs. David A. Anderson, New Glasgow, N. S., who writes:—"I have used Baby's Own Tablets for my children for some time from my experience I would not be without them. I would urge every mother to keep a box of the Tablets in the house." The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, drive out constipation and indigestion; break up colds and simple fevers and make teething easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Transaction of National Importance

Sun Life Assurance Co., Purchase Block of United Grain Growers Twenty Year Bonds

A financial transaction of national importance, but of special interest to farmers and grain growers of the West, has just been completed between the United Grain Growers and the Sun Life Assurance Company of Canada, according to an announcement obtained by this newspaper from Mr. E. A. Macnutt, treasurer of the Sun Life.

The remarkable growth and the vast amount of good accomplished by the United Grain Growers in their measures of co-operation in the marketing of grain, etc., for the farming community of Western Canada are well known. The board of directors of the United Grain Growers intend to branch out on a still larger scale, and have just authorized an issue of two million dollars of six per cent. first mortgage twenty year gold bonds.

Three quarters of a million of this issue has just been purchased by the Sun Life of Canada, and the remainder of the issue when needed by the Grain Growers will be offered to the Sun Life.

This is an instance of a Canadian life company which draws its resources in the way of premiums from the public, directly assisting a co-operative enterprise of a very important section of the people.

The bonds are secured on the elevators and real estate of the Grain Growers spread over the provinces of Alberta, Saskatchewan and Manitoba, and the Company is composed of more than 30,000 shareholders who reside in these western provinces and are farmers and grain growers.

The head office of the United Grain Growers is in Winnipeg and the officers are: president, Hon. T. A. Cramer; 1st vice-president, C. Price Jones; 2nd vice-president, J. Kennedy; secretary, J. A. Hand; treasurer, F. M. Black. The head office of the Sun Life is in Montreal.

Minard's Liniment Relieves Neuralgia

Food Shortage in Egypt
Food shortage in Egypt is being seriously felt in wheat provisions. Natives are unable to obtain wheat flour. Discontent is increasing in consequence.

In relation to all imports of food scarcity in Egypt, it is well to remember that for several years, owing to the fabulous value of cotton, Egyptians neglected the cultivation of foodstuffs.

It's easy to convince a woman that the photograph that flatters her is a better likeness than that which she sees reflected in the mirror.

Big Road Contracts to Be Let

Eight Hundred Miles of Road to be Built in Manitoba

Tenders for grading about 800 miles of roads will be called for in Manitoba within the next two months, according to information supplied by the province. This work will be let in contracts of from two to 75 miles.

The work will be done under "The Good Roads Act," which has been in successful operation for the past six years. Up to the present, about 1,200 miles of work has been graded and about 400 miles gravelled under the act.

In addition to the road work, it is expected that over 100 concrete bridges will be constructed. The bridge work will include a steel bridge 650 feet long over the Red River; a concrete arch 100 feet clear span over the La Salle River; several bridges of concrete over the Assiniboine River, and a number of bridges from 30 to 50 feet clear span. Up to date, 384 bridges have been built under "The Good Roads Act," of which 271 were of concrete.

It is expected that over 4,000 miles of grading will be done in Manitoba within the next four years, and a large percentage of this mileage is to be gravelled.

Minard's Liniment Cures Burns, Etc.

Rapid Loading of Vessels

Docks At Duluth Speediest Ore-Loading Piers in the World

Figures of loading and unloading records made at the fastest and largest shipping docks in the world have just been announced. The steamship N. B. Ream passed through the Duluth ship canal at 11:30 p.m., May 29, and out the same canal 3 hours and 45 minutes later with a cargo of 11,880 gross tons of iron ore. She was at dock 55 minutes. Later in the season the H. D. Williams took on 12,786 gross tons in 45 minutes at the dock, and 3 hours and 50 minutes in the harbor. Still later the D. G. Kerr took on 12,689 gross tons in 35 minutes at the dock. This is the astet time for loading ever made anywhere. The docks at Duluth, Minn., and Northern road, where these records were all made, are recognized as the speediest ore-loading piers in the world. It is not unusual to load a ship at the rate of 1,000 tons in 4 minutes. The ship V. A. McCune and L. C. Hanna unloaded coal at Duluth and Western and Berwind No. 2 docks at Duluth, during the past summer, at the rate of 1,150 and 1,272 tons an hour. These also are world's records.

"SYRUP OF FIGS"

CHILD'S LAXATIVE

Look at tongue! Remove poisons from little stomach, liver and bowels

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative. A physic for the little stomach, liver and bowels. Children love its delicious fruit taste. Full directions for child's dose on each bottle. Give it without fear. Mother! You must say "California."

The Candid Volunteer

An Australian who did clerical work for his government during the war tells how in going through a batch of enlistment forms one day and checking the usual questions as to name, age, address, occupation, and so on, he came upon one decidedly original reply. The question, "State in which enlisted," was answered by the assurance, "strictly sober."

An Englishman and an Irishman met one day, and the former, wishing to have some fun with Pat, asked him if he was good at arithmetic. "I am that," said Pat.

"Then could you tell me how many shirts I could get out of a yard?" asked the Englishman.

"Well," said Pat, "that depends whose yard you get into."

No woman can reform a husband by continuous lecture process.

Will Locate in B.C.

Iron and Steel Industry On The Pacific Coast

A powerful British iron and steel company will locate in British Columbia and establish a complete plant for turning out all products of the industry, according to advice received at Vancouver, B. C., from England. Work on preliminaries connected with this firm's flotation for activity in western Canada has already been started. This company will be capitalized at five million pounds sterling, and will work in British Columbia with an established coal company having rail and water connections. Native ores of British Columbia are to be utilized.

Mill for Grinding Alfalfa

New Machine Will Turn Out The Actual Meal

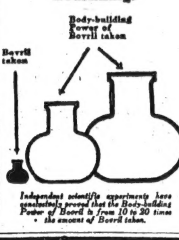

One of the results of the huge alfalfa yield in the Lethbridge and Coal-dale areas of Southern Alberta during the past season and an indication of the confidence of the farmers there that this is merely a beginning of the yields of this fodder crop that will be produced, is made evident by the purchase by a local company of an alfalfa mill costing \$15,000. This mill grinds the whole alfalfa plant into a meal, which, it is declared, has proven the most economical way to feed alfalfa. Alfalfa chop has been used in the past, but the new machine will turn out the actual meal. Its installation will mark the advent of a new important industry in the development of the district.

SILAGE FROM SUNFLOWERS IS BEST FOR COWS

Prof. Hutton's Tests Show, Larger Milk Yield Than From Any Other Feed

More milk of better quality was produced from cows fed on sunflower silage at the C.P.R. farm at Strathmore than was received from them when fed on either corn or peas and oats.

Prof. Geo. H. Hutton, head of the animal husbandry branch of the C.P.R. department of natural resources has been advocating silage as a solution of feed troubles of the dairy farmers of the province for a number of years. Two years ago he told the dairymen at Calgary of the advantages of feeding silage composed of peas and oats. Last season he experimented at the C.P.R. farm on sunflower silage and the following are the results of tests of two weeks' duration made with 40 head of Holstein cows, the figures being taken days of each period, the animals being fed 30 pounds of silage a day:

Silage	Lbs Milk	Test
Sunflowers	27.6	3.6
Peas-Oats	25.88	3.5
Corn	25.4	3.4

Not only was the daily production of milk greater and of better quality, but the cows showed a daily gain in weight of 2 pounds when on the sunflower diet, but gained only 0.1 pounds on peas and oats, and 1.85 on corn.

During the week Mr. Hutton invited a number of the prominent breeders, dairy farmers, business men and newspaper representatives down to the Strathmore farm where they had an opportunity to look into the whole question and where they got all the information which Mr. Hutton had been able to obtain as a result of the careful investigations he had made into the question of silage.

On irrigated land on the farm they had secured the following yields: Sunflowers, 34.6 tons; corn, 14 tons; peas and oats, 7 tons. Mr. Hutton said there was no portion of Alberta which would not produce one or all of these silage crops and yields of from 14 to 30 tons of sunflowers had been obtained over widely scattered areas last year.

It was stated at the recent dairy convention at Edmonton that small silos, 26x16 feet, which would have a capacity sufficient to meet the requirements of the ordinary small farm, could be built for about \$500 and that the provincial government was willing to give information on the subject.

All those who had the pleasure of visiting the Strathmore farm felt that the stockmen and dairy farmers of the west are indeed indebted to Professor Hutton for the very thorough manner in which the tests have been conducted and the definite information which is now available on this very important matter of winter feeding.

Boost

Boost your town, boost your friend:

Boost the lodge that you attend

Boost the street on which you are dwelling

Boost the goods that you are selling

Boost the people round about you

But success will quicker find them

If they know that you're behind them

Boost for every forward movement

Boost for every new improvement

Boost the man for whom you labor

Boost the stranger and the neighbor

Cease to be a chronic knacker

Cease to be a progress blocker

If you'd make your town better

Boost it to the final letter.

Stewart, B. C., Mining Camp.

Stewart, B.C., on the Portland Canal, the dividing line between Canada and Alaska, is producing the most marvelous development in silver mining in Canadian history.

It is even estimated that it will outlive the famous Cobalt country.

This year all transportation lines are planning to handle unprecedented business.

It is eight years since minerals were discovered in the Stewart country in paying quantities.

But recently the most immense deposits of highly mineralized ores were found in America.

One value has been found in silver and gold to the extent of thousands of dollars per ton.

Diamond drilling and other development work is progressing with great rapidity.

Formulas for Mixing Gopher Poison

- (1) Mix thoroughly one ounce strychnine (powdered) and one ounce baking soda.
- (2) Sift this into three quarters pint of thin, hot starch paste, and stir to a creamy mass. The starch paste is made by dissolving one heaping tablespoonful of dry glass starch in a little cold water, which is then added to three-quarters pint of boiling water. Boil and stir constantly until a clear thin paste is formed.
- (3) Add one quarter pint heavy corn syrup, and a tablespoonful of glycerine, then stir thoroughly.
- (4) Add one eighth ounce saccharine and stir thoroughly.
- (5) Pour this poison solution over two gallons wheat and mix thoroughly so that each grain is coated. Prepare the poisoned grain twenty to 48 hours before using. For mixing small quantities an ordinary galvanized wash tub is convenient. For larger quantities a tight, smooth box may be used, and the mixing done with a spade.
- (6) A teaspoonful of poisoned oats should be placed in each gopher hole on clean, hard ground, letting it scatter slightly as it falls (placed in this way it will not endanger the stock and birds.) Do not put the poisoned grain on the loose dirt of the mound or of the holes. Each quart of the poisoned grain is sufficient to treat about 60 holes.

RECIPE for Preparing Wheat for Poisoning Gophers:—Dissolve one ounce of strychnine or sulphate of strychnine in one quart of vinegar to which has been added one quart of hot water. Stir with a stick until all the strychnine is dissolved, boiling if necessary. Add one pound of sugar or one pint of molasses, and a tea spoonful of oil of anise. Pour the hot solution over half a bushel of wheat, and, if necessary, add enough hot water just to cover all the wheat. Let the grain stand in the solution for 24 hours, and if any of the solution is still unabsorbed, add a handful of shorts and stir the whole mixture well. Put a table-spoonful of the moist grain into the entrance of each gopher hole.

ST. PATRICK

Scotland, England and France and Wales all claim to be St. Patrick's birthplace. But all agree that he was of a patriotic family. He was born about the year 372, and when sixteen was carried off to Ireland by pirates who sold him into slavery. Here he passed seven years, during which he acquired a knowledge of the language. Escaping, at last he reached the continent, where he was successful. And then Pope Celestine sent him to Ireland to preach the gospel. His principal enemies there were the client faith—who, being magicians, would have been formidable antagonists to anybody with less miraculous powers than St. Patrick. Their antagonism was so great that he had to curse their fertile lands, so that they became dreary bogs; to curse their rivers, so that they produced no fish; to curse their kettles, so that no amount of fire and patience could they ever be made to boil; and, as a last resort, to curse the Druids themselves so that the earth opened and swallowed them up. A popular legend tells that the saint and his followers found themselves one morning with no fire to cook their breakfast. St. Patrick made them collect a pile of ice and snowballs, which he breathed upon, and it instantly became a fire. The greatest of his miracles was the banishment of venomous reptiles. Colgan relates that St. Patrick did this by breathing upon a drum, which he struck so fervently that he knocked a hole in it, thereby endangering his success. But an angel appeared and mended the drum, and the patched instrument was long exhibited as a holy relic.

The shamrock is almost universally worn in Ireland on St. Patrick's Day. The popular notion is that when St. Patrick was preaching the doctrine of the Trinity he used this plant, bearing three leaves on its stem as a symbol of the great mystery. The trefail in Arabic is called "Sham-rakh" and Pliny, in "Natural History" says that serpents are never seen upon trefail, and it prevents against scorpions. This, considering St. Patrick's connection with snakes is really remarkable.

ABSORPTION PLANT MAY BE CLOSED DOWN

Arbitrary Order Issued to Dingman Co. to Conserve Residual Gas

After an expenditure of \$80,000 spread over a couple of years of the hardest work in experiments and tests the Calgary Petroleum Products company, which has just got its gasoline extraction plant in nice running shape has been formed by the Dominion government that within a month they must make arrangements to conserve the residual gas from which the gasoline has been extracted.

If this order is put into effect it means that the plant will have to be shut down for an indefinite period, or altogether. The company has already made a proposal to the city to have the gas piped to the city limits, but nothing has been done in the matter. It has also been suggested that arrangements could be made with the Calgary Gas company to connect up the flow from the Okotoks field with their pipe line running into Calgary, but this is still unsettled and nothing can be accomplished within a month.

Why the government should take this arbitrary step at this date when their officials must have known that for years the company was endeavoring to get their absorption plant in operation—and they also knew that no arrangements had been made for utilizing the gas—it is impossible to conjecture.

This company has in operation the first plant of its kind in Canada and during the past few months has been producing gasoline in considerable quantities and preparations were being made to give the gas supply a thorough test as to the likelihood of a constant supply being available, in which case the plant would be enlarged.

It has been developing a very important natural resource of the country and helping to supply the gasoline which is now being imported in such large quantities into Canada from the United States. Then, just as soon as it gets going nicely the government steps in and kills the whole scheme.

There are abandoned wells in the northern portion of the province where gas had been going to waste for years and no action was taken to work was done. But as soon as somebody was developing the gas, the lid is put on.

The attitude of the Dominion government towards the development of the oil industry in this province has been one which is very difficult to imagine. In fact, in every way it has been hindered rather than developed. Representations have been made to the government for several years past by men who were engaged in the development work regarding the duty which was charged on oil well supplies, which all have to be imported, and also on the question of the bounty which the wells of the province are very largely deprived of because of the high grade of the oil which is produced. Three different times delegates have been sent to Ottawa and the question taken up with members of the cabinet. In every case they were given to understand that some measure of relief would be granted them.

Up to the present there has not been one step taken to remedy the very apparent disabilities under which the development of this important resource is being carried on.

Instead of assistance, one of the pioneer companies in the oil industry in the province is threatened with the removal of one of the sources of revenue on which it has spent \$80,000 in developing and has only just got on a paying basis, proceeding with drilling operations on its No. 3 well, which is now down about 650 feet.

Natural Gas at Irma, Alberta

One of the best natural gas wells in Western Canada was recently struck near Irma, Alberta, according to advice received at Grand Trunk Pacific headquarters. The work of capping and testing this well was just completed last week. Since gas was struck at this well until it was capped, it is estimated that between five and six million feet of gas escaped per day, and the test registered 800 pounds pressure, which indicates that it is one of the best wells in Canada. Gas was struck at a depth of 1940 feet.

BE A BOOSTER

If you like to live in the kind of a town,
Like the kind of a town you like;
You needn't slip your clothes in a grip
And start on a long, long hike.
You'll only find what you left behind
For there's nothing that's really new;
It's a knock at yourself when you
Knock your town—
It isn't the town, it's you.

Real towns aren't made by men afraid
Least somebody else gets ahead;
When everybody works and nobody
Shirks
You can raise a town from the dead
And if while you make your personal
stake
Your neighbors can make one too,
Your town will be what you want to
see—
It isn't the town, it's you.

Trotsky Would Put Labor Under Military Discipline

Moscow.—Militarization is the only means to fully utilize Russia's manpower, said Leon Trotsky, Bolshevik minister of war, addressing the ninth convention of the Communist party here. His address was directed to defining the relation between the mobilization of industry and the industrial rehabilitation of Russia.

"Mobilization is more necessary now than it was formerly," he declared. "We have to deal with the present population and masses of unskilled labor which cannot be utilized to the fullest extent by any other means than military discipline. Trades unions are capable of organizing great masses of qualified workers, but 30 per cent. of the people cannot be reached by this means."

Trotsky declared the working army which is built on the principle of compulsory work, is no less productive than was the old system of competition, and came out in favor of personal, rather than collective administration. He asserted political administration of railroads, was unsatisfactory and temporary, adding, however, it was necessary because railroad workers are more conservative in tendency than men engaged in other branches of labor.

Appeal for Funds To Help League

God Help Our Children If League Is Allowed to Wither and Die

London.—Earl Grey, Premier Lloyd George, Admiral Beatty, former premier Asquith, Lord Robert Cecil, and John R. Clynes published an appeal in the London Times for 1,000,000 pounds sterling, to keep fresh in the minds of the people of this country the spirit and ideals which underlie the covenant of the League of Nations.

The appeal points out what the League of Nations union has already done in its education campaign. It says that a million pounds sterling sounds like a large sum but that if the British people do not support the League of Nations with all their might and resources, "the league itself will assuredly wither and die and if the league should die, God help our children, for no human agency save them from calamities to which those of our late war will appear as the merest trifle."

Australia Delays Action

London.—The Daily Mail's Sydney correspondent says that the Commonwealth government is not taking action regarding a larger navy until after the Imperial conference. It adds that Canada's decision to not enlarge her navy has caused local anxiety regarding the care of the Pacific.

Canadian Cars In U. S.

Ottawa.—In the house of commons the minister of railways informed Joseph Archambault that of 59,716 Canadian cars at the United States, 10,840 belonged to the Canadian National Railway, 15,482 to the C.P.R., 21,028 to the Grand Trunk Railway and 12,366 to other Canadian railways.

West Demands Control of Our Natural Resources

Ottawa.—Development of Canada's natural resources and establishment of a more uniform system of experimental farms came up for discussion in the house of commons. The first question, that of natural resources, was raised on a motion by Captain Manion, Fort-William and Rainy River; the second by Donald Sutherland, of South Oxford. Western members seized the opportunity again to urge transfer of western resources to the provincial governments. Dr. Cowan, Regina, argued that had the western natural resources been in the hands of the provincial governments, action to develop them would have been taken long ago. The present situation was "impossible."

"If myself heard Sir Robert Borden declare in 1911 that he would do all in his power to see that the resources were turned over to the provinces," Dr. Cowan declared further. He spoke of millions of feet of lumber

All-Canadian Film Service

Legislation to Amend Moving Picture Act in British Columbia Planned

Victoria.—Legislation to amend the British Columbia Moving Picture Act, designed to authorize the creation of machinery for the taking of pictures in British Columbia of an educational nature and for their exhibition in the "Movies" and amusement houses of Canada, was introduced here by Hon. J. W. Deb Farris, attorney-general. The amendment is interpreted to contemplate the inauguration of an all-Canadian film service in the matter of purely educational and domestic subjects peculiar to the Dominion.

Says Sims Was Indiscreet

Rodman Criticizes Rear Admiral For Publishing Confidential Conversation

Washington.—Admiral Hugh Rodman, commander-in-chief of the Pacific Fleet, told the senate investigating committee today that Rear Admiral Sims' letter to Secretary Daniels criticizing the navy's part in the war, was "very indiscreet."

"Admiral Sims' indiscretions," he said, "lay very particularly in his breach of confidence in making public an intimate and confidential conversation, which should have been held secret."

The witness referred to Sims' testimony that Admiral Benson, former chief of naval operations, told him prior to his departure for London, "not to let the British pull the wool over your eyes; we would as soon fight them, as the Germans."

Admiral Rodman said the publication of that statement by Admiral Sims, "no doubt has had its effects upon the cordial relations which heretofore existed between us and one of our closest allies."

Irish Outrages Enumerated

London.—One thousand and eighty-nine outrages were committed in Ireland between January, 1919, and March 29, 1920, according to an official white paper, which attributes them to the Sinn Fein movement.

Thirty-one police, military and officials; and five civilians were killed; 81 were fired upon and 32 were assaulted. This total does not include the police barracks, to the number of more than 200, destroyed during Easter week.

France Consulted With Allies

Paris.—A note by Premier Millerand was read to the ambassadors today and then delivered to the German charge, Wilhelm Von Meyer, in which the premier declared that France had taken great care to inform and consult with the allies before occupying the Rhine cities.

Farmers Want 'Toronto World'

Toronto, Ont.—Negotiations are under way for the United Farmers of Ontario to purchase the Toronto World, according to information in circles well informed of the farmers' plans.

He spoke on the need for developing Canada's resources. The government might take over development itself, or assist private enterprise. Capt. Manion did not stipulate that the government should adopt any particular method, but he strongly advised immediate action.

Major Redman, Calgary, favored scientific research in every possible way and advocated establishment of government bureau on natural resources similar to that of the United States. There was plenty of coal in Alberta if railway rates could be modified to compete for eastern trade.

Indians Will Appeal To High Court

To Decide the Matter of the Rights And Status of Indians In Canada

Ottawa.—That the matter of deciding the rights and status of Indians in Canada will likely be taken to the highest court in the British Empire, was the statement made by A. C. Delisle, who described his standing as the mayor of Caughnawaga, and chief of the Caughnawaga Indians. Asked pointblank by the chairman of the commission deliberating on the proposed amendments to the Indian Act, Delisle said he did not know whether he was a subject of the present King of England, but he did know that he was entitled to protection from the British Crown by reason of treaties entered into between the British Crown and his forefathers as far back as 1744.

The sitting of the committee was taken up almost entirely with the hearing of chiefs from the various tribes. Mr. Delisle, who represents about 2,400 members of the Caughnawaga band, said they wanted to give any Indian the right to be a white man, but they did not want to make it in any way compulsory.

"This Indian act has made Indians of more white men than it has made white men of Indians," he declared with vehemence. He also strongly objected to a man who changed his race being allowed to stay on the reserve. The man should be compelled to sell his land to the remaining members of the band.

"It simply means expropriation and the disintegration of the band, and as such is entirely unconstitutional. My opinion is that it should go to England to be decided by the highest courts there."

Andrew Paul, a young Indian representing the Squamish nation of Indians of British Columbia, corroborated the claim of Delisle. His people, he said, had no copies of the proposed bill and did not want any. "They do not want to understand it, they do not want to understand, whatever it is," he said, and then left the room.

Other delegates urged that they should not be enfranchised because they did not pay any taxes.

Abandon Control of Newsprint

Announcement Follows Decision Of Supreme Court in Price Bros. Case

Ottawa.—The board of commerce announces that it will not henceforth claim to exercise any control whatever over newsprint paper in Canada. The announcement follows the decision of the supreme court in the Price Brothers case that newsprint paper was not a necessity of life within the meaning of that expression in the Combines and Fair Prices act and that the powers exercised by the board of commerce as newsprint controller were without jurisdiction. The board points out that the effect of the supreme court's decision is to render inoperative the orders-in-council constituting the board of commerce as controller of newsprint paper in Canada, and for this reason the board announces its intention of abandoning the control of newsprint, unless the board is subsequently invested, if that be legally possible, with competently-granted power.

The board's announcement adds that the supreme court's decision does not involve the general powers of the board of commerce, except in so far as it, to some extent, limits the interpretation which the board might place on the expression, "necessity of life." The general powers, it is added, will be pronounced upon by a subsequent decision of the court.

This decision will follow a rehearing in the supreme court on May 4, next, of certain points in the recent argument heard in the court to test the powers of the board of commerce as a price-fixing tribunal.

Bolsheviki on Polish Front

Washington.—Bolsheviki Forces on the Polish front are being regrouped and fresh forces brought up. The Polish war office today advised Major-General Brynk, military attaché of the Polish legation here.

"In the sector of Polesia, the Bolsheviki are on the defensive," the despatch said. "On the Volhynian front they continued to attack us near Slawetschno."

Buried Shells Kill French Farmers Cambrai.—Two explosions in which 12 persons were killed and two injured have occurred in the district of Villers Guislain, 18 kilometers from Cambrai. The explosions were caused by agricultural tractors coming in contact with unexploded shells in fields which were being plowed.

W. N. U. 1311

Germany Would Send Arms to Irish

Report of Uprising on Easter Is Said To Have Been Confirmed

London.—Recent unconfirmed reports of a Sinn Fein plot for an uprising in Ireland were based on fact, according to the Irish police. They state that they are in possession of information not only indicating that a rising was intended, but that certain Germans in Berlin had engaged to furnish war material.

In this connection Thomas J. Loughlin, a Dublin business man and a member of the Sinn Fein, has been arrested under the Defence of the Realm act. No definite charge has as yet been deferred against him, but the Irish police state that his arrest was effected after they had learned that he was a party to a treaty with the Germans for arms and ammunition.

With Loughlin's name, the police link that of Baron Lewis Von Horst, a former resident of the United States, who is now in Berlin, with whom it is alleged Loughlin was negotiating.

For Wheat Deliveries

New Regulations On Deliveries Of Wheat Promulgated By Board

Winnipeg.—The Canadian wheat board has issued a regulation (95) for the delivery of wheat by milling licenses, effective from this date inclusive, which orders:

1.—All wheat purchased by the milling license of the board shall, on demand, be delivered to the board.

2.—Until July 31, 1920, the board will purchase, or provide a purchaser for all wheat grown in the provinces of Manitoba, Saskatchewan and Alberta, delivered by any milling license of the board in store:

The Canadian government elevator at Calgary, Saskatoon or Moose Jaw. A public terminal elevator at Port Arthur.

Other elevators in Ontario and Quebec as specified.

Providing such milling license declares to the board on or before July 15, 1920, the quantity and grade of wheat intended to be delivered to the board in store, the elevators herein before designated and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board, basis in store at public terminal elevator at Port Arthur, or other elevators in Ontario and Quebec as specified.

3.—Until June 30, 1920, the board will purchase or provide a purchaser for all wheat grown in the province of British Columbia delivered by any milling license of the board in store the Canadian government elevator, Vancouver, provided such milling license declares to the board on or before June 15, 1920, the quantity and grade of wheat intended to be delivered to the board in store the said elevator and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board, basis in store the Canadian government elevator, Vancouver, provided such documents of title, together with any assessments paid to the board thereon in accordance with the regulations of the board.

4.—Until June 30, 1920, the board will purchase or provide a purchaser for all wheat grown in the province of British Columbia delivered by any milling license of the board in store the Canadian government elevator, Vancouver, provided such milling license declares to the board on or before June 15, 1920, the quantity and grade of wheat intended to be delivered to the board in store the said elevator and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board, basis in store the Canadian government elevator, Vancouver, provided such documents of title, together with any assessments paid to the board thereon in accordance with the regulations of the board.

Strike Leaders Are Nominated

Winnipeg.—R. B. Russell, George Armstrong, W. A. Pritchard and R. J. Johns, four of the convicted strike leaders, were nominated for seats in the provincial legislature at a meeting of the Winnipeg branch of the Socialist party of Canada tonight. As Rev. William Ivens is on the tentative slate of nominations made by the Dominion Labor party last week and Alderman Queen will, it is understood he is the nominee of the Social Democrat party, six of the seven strike leaders given jail terms, are likely to figure in what will undoubtedly be the most unique election in the history of Manitoba.

To Prolong Disarmament

Berlin.—The Berlin Tageblatt says it is informed that the German government is negotiating with the Entente for a prolongation to October 7 of the agreement of August, 1919, for the maintenance of troops in the neutral zone, pledging that a strong police force is required to maintain order in that area.

Rome.—Official recognition of the government and autonomous constitution of Albania has been extended by the Italian government according to the Epoca.

Action of France Taken Without Consent of Allies

Divorce Court for Ontario

Bill Introduced in Senate Confers Jurisdiction to Province

Ottawa.—The bill introduced in the senate by Senator Ross, and given the blessing of the government, confers on the supreme court of Ontario, jurisdiction in regard to divorce. There is a similar bill in relation to Prince Edward Island. In consequence every province will now have divorce laws.

The reform has been long talked of and is brought about by the appalling number who seek divorce by the parliamentary method. There are 128 applications this session. Of this number, 75 are from Toronto alone. The senate is not divesting itself of the right it possesses, but when the enactment becomes law, its divorce activities will become very much reduced. As the main opposition to the reform has come from Quebec, and as that province is left alone, the presumption is that the measure will pass with little difficulty.

Tried to Destroy Mines

Bolsheviki Troops Plundered Stores And Fired at Inhabitants

The Hague.—The Nieuwe Courant, describing the plundering of Essen by the Reds before the occupation of the city by government troops, says:

"Part of the retreating Red troops gathered during the morning in Essen, captured all the arms which they had delivered, plundered the shops and finally left the town in automobiles, firing at the inhabitants. The Red army commander ordered that the mines be blown up, but the mine guards succeeding in repulsing the Reds, although great damage was done to the mines."

Bottom, in the Recklinghausen region, is also in the hands of the government troops.

The occupation of the Mayence district also was a violation of the peace treaty, says The Hague Vrederland, in an article declaring that the German action in the Ruhr district likewise was contrary to the treaty of Versailles.

Newsprint Will Be Exhausted in 10 Years

Cleveland.—Newsprinters on this continent will be without paper at the end of ten years unless there is conservation of pulp, declared Jason Rogers, publisher of the New York Globe, at a meeting of the Cleveland Advertising Club today.

"The output of print paper is now dwindling rapidly," he said, "and the outlook at the pulp mills of Canada and United States will not be adequate to meet the demand, even if the supply of spruce timber holds out."

Earl of Minto Taking Ranch

Montreal.—The Earl of Minto has announced his intention of taking an active interest in his ranch in Alberta, which borders upon that recently purchased by His Royal Highness, the Prince of Wales.

Rhine Republic Is Likely

Paris.—The newspapers of Berlin say today that news received from all parts of the Rhine provinces imparts the proclamation of a Rhine republic is imminent, according to despatches from the German capital.

French Troops Clash With Mob At Frankfurt

Mayence.—Disturbances broke out in Frankfurt today, but energetic intervention by the French troops restored order. From German sources it is learned that six Germans were killed and 35 wounded.

It is reported that the manifestations which gave rise to these incidents were due to an order originating in Berlin.

"The first day of the occupation of Frankfurt passed without incident; the reception was by the populace was most cordial," said General Degoutte, the French commander, on his return from a tour of inspection.

Then suddenly, on orders from

London.—It is stated that the British government has sent a protest to the French government with regard to the occupation of the Ruhr region.

After a long conference the French ambassador, Paul Cambon, had with Premier Lloyd George to day and a full discussion of the Franco-German incident by the cabinet council, at which the French view was fully explained to the British ministers, an authoritative statement was issued to the effect that France acted entirely on her own initiative in deciding to occupy German towns; that Great Britain, the United States, Italy and Belgium were all opposed to the plans and that France's action has caused a delicate situation. The matter is under discussion by the British and French governments and the hope is expressed that the situation may be eased.

The statement recites various expedients for dealing with the Ruhr situation, among others, the sending of allied officers with the German troops to supervise the German withdrawal. Another alternative was that the decision should be left with the German government, with the stipulation that unless the status quo was sufficiently restored the allies themselves would occupy German points to enforce their demands.

The statement proceeds: "The German government appears to have acted precipitately and France to have responded by adopting a plan which was only intended as a last resort, and even then to have been the affair of the allies and not of any one of them simply."

Great Britain, Italy, Belgium and the United States, it is declared, all felt that the task of restoring order should lie with Germany and all were opposed to their regular forces being called upon except as a last resort, to undertake what are virtually police duties. It is pointed out that France feared some ulterior motive on the part of Germany and doubtless acted in good faith, but, adds the statement, the immediate result is that the responsibility for her action cannot be shared by the allies as a whole and certainly there is no intention on the part of the British government to allow British soldiers to act as police between hostile German factions and incur all the odium of such a position, to say nothing of its risks."

The statement concludes:

"If and when France's suspicions of Germany's ulterior motives and deliberate flaunting of the terms of the peace treaty become accomplished facts, the allies would doubtless be prepared to act instantly and vigorously in concert to vindicate the position and respect for the provisions of the treaty. But for the time being, it may be taken that no British soldier will participate in the occupation of German cities in the neutral zone."

Railroad Strike Spreading

Chicago.—An unauthorized strike of railroad employees, which started a week ago in the Chicago switching district, by the discharge of a yard conductor, tonight had spread until it had effected 25 railroads and in Chicago had thrown more than 50,000 out of work, directly and indirectly.

More than 10,000 union railroad men in Chicago and several hundred at Buffalo and Champagne, Illinois, were on strike. Many hundreds of men in Chicago packing houses were thrown out of work by lack of livestock.

Berlin, a certain ferment seized the popular mind. This ferment degenerated into aggression and our soldiers in self-defence were obliged to use their arms. So far as I know we had no losses.

"The incident shows how we must watch proceedings in Berlin, and that is why the events in the Ruhr demand my whole attention, you cannot consider what is going on in the Ruhr and here, tonight there is a close relation between the events we are witnessing today. The aggressions at Frankfurt and events in the Ruhr are attributable to the same military reaction. Of that we have absolute proof."

BAR U AND NAMAKA FARM PERCHERONS

The largest stud of the Pure-bred Percherons in the World. The first Percheron-breeding farm established in Canada. The only firm on the American continent from which British horsemen have selected Percheron breeding stock to establish studs in Britain.

Do not let the British breeders come to Canada and carry off all our best foundation stock. Do not be satisfied with the cheap stallions brought in by irresponsible dealers and stallion peddlars from the United States, when you can buy the best individuals of the best breeding material in the world in the hands of the best breeders in the business for 25 years, and expect to remain in the business. We have seventy-four head of Pure-bred Percherons of our own raising on hand to select from. You can see their sires and dams, and if you cannot choose one from the lot to suit you we will give you every assistance in our power. Write for prices or come to Calgary, Alberta, and we will meet you and show you the stock at any time.—Address:

GEORGE LANE (Desk B.), CALGARY, ALBERTA

FARMERS BREED PERCHERONS

The only breed of draft horses ever shipped back to England from Canada for breeding purposes were Percherons. The greatest breed of draft horses in North America are Percherons. The safest investment in draft horses today is Percherons. A profit to own—A pleasure to handle.

You will make no mistake in your horse breeding this year if you use a Percheron sire.

She Wears Nothing Faded and Shabby

But "Diamond Dyes" Her Old Apparel Fresh and New.

Don't worry about perfect results. Use "Diamond Dyes," guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods, — dresses, blouses, stockings, skirts, children's coats, feathers, draperies, coverings—everything.

The Direction Book with each package tells how to "Diamond Dye" over any color.

To match any material, have dealer show you "Diamond Dye" Color Card.

A Different Matter

Countryman (to dentist): "I won't pay anything extra for gas, just junk her out, if it does hurt."

Dentist: "You are plucky, sir, let me see the tooth."

Countryman: "Oh, 'tain't me that's got the toothache; it's my wife. She will be here in a minute."

Pluck loses no time on account of hard luck.

For Colds, Catarrh or Influenza

Do you feel weak and unequal to the work ahead of you? Do you still cough, or do you sneeze, or do you have a sore throat? Is your blood thin and watery? Better put your body into shape. Build strong!

An old, reliable blood-maker and health tonic made from wild roots and berries, is Dr. Pierce's Golden Medical Discovery. This "nature remedy" comes in tablet or liquid form. It will build up your body and protect you from disease germs which lurk everywhere. One of the active ingredients of this temperance alterative and tonic is wild cherry bark with stillingia, which is as good for the lungs and for coughs; also Oregon grape root, blood root, stone root, Queen's root—all skillfully combined in the Medical Discovery.

These roots have a direct action on the stomach, improving digestion and aiding the assimilation of food. These herbal extracts in the "Discovery" aid in blood-making and are best for scrofula. By improving the blood they fortify the body against an attack of grip or colds.

Catarrh should be treated, first, as a blood disease, with this alterative. Then, in addition, the nose should be washed daily with Dr. Sage's Catarrh Remedy. Send for the trial pipet of Medical Discovery Tablets or Catarrh Tablets to Dr. Pierce's Laboratories, Bridgeport, Oak.

Demand for Good Horses

Sires At This Season Are A Community Need

You should co-operate with your neighbors in order that some good sires may be brought in by private parties, or leased before the breeding season opens. Because:

1. The demand and price for good horses and mules is increasing in cities.
2. Farm demand is improving.
3. There is a shortage of good horses and mules of all kinds.

City trade is improving, because transportation users of all kinds have discovered after years of experience that horses furnish the cheapest of all sources of power on short hauls. On this Harry Vickers, president of the Fuel Cartage Company of Chicago, says:

"There is work today that the horse cannot do—long distance hauling with rapid transportation—but the motor can never take the place of the horse, because the horse can do the work on short hauls just as rapidly and at a lessened cost of 25 to 40 cents on the dollar, consequently we never allow a truck to displace a team. We will buy a truck to do the work that a horse cannot do, but we don't send a truck to do the work that a horse can do. It would be like having a dollar and throwing away 40 cents."

Of the shortage, W. Y. McGraw, president of the McGraw Transfer Company, Minneapolis, says: "What we teaming contractors want is good horses. We don't want scrubs light of weight, incapable of hard work, and selling cheap. We want horses that will weigh 1,700 pounds or more and we are willing to pay for them. A teaming contractor in this city paid \$800 for a pair of five-year-olds yesterday that weighed 3,200 pounds. The big trouble is that the farmer expects us to pay high prices for a green horse, one that is liable to distemper and is not properly broke. The buyer of such a horse is taking a big chance that he'll die or be laid up and, consequently, won't pay as much for him. Give us good, sound, big horses with a little experience behind them. We can't get enough of them and the demand will never run out."

Claims of truck and tractor manufacturers that horses and mules are destined soon to disappear are very properly met with the query: "Why should horses and mules, which, according to your views, are obsolete and destined to speedy disappearance, be in greater demand and at higher prices than automobiles?"

The best thing a farmer can do this spring is to breed his good mares to a first-class stallion.

Indians Seeking Rights

Indians of East and West Decide To Stand By One Another

An informal meeting was recently held in Ottawa of representatives of the various influential bodies of Indians in Canada. The delegates were representative of the Council of the Six Nations of Brantford and of the allied tribes of British Columbia. Whilst no resolutions were passed it was decided to stand by one another in the interests of their rights and privileges, whilst a proposal to establish a general Canadian Indian alliance was favorably received.

The principal subjects discussed were (1) the pending bill before parliament proposing compulsory enfranchisement of Indians; (2) The wrongs of the British Columbia Indians, arising from the complete denial of that province of any land rights or other tribal rights whatsoever to them. The bill is now before the House of Commons, by which it is proposed to carry into effect the agreement regarding reserves entered into between the two governments in the year 1912, which was based upon the assumption that the Indian tribes of British Columbia have no land rights; (3) the interesting historical claim of the Six Nations to the government of their own internal affairs. The conference is to be continued and is expected to be of benefit to all Indians in Canada.

She Could If She Would

For Decreasing Armaments

Benefit Relationship Between U. S. and Britain—By Disarming

Discussing the American presidential situation and its possible effect on the relationship between Great Britain and the United States, the London Daily News, under the caption "America and Arms," refers to the reaction from war in the United States.

"Rightly or wrongly," the newspaper says, "America revolted against the treaty her representatives had helped to draft, and under the influence of that emotion resolved not to merely maintain her detachment from Europe, but to arm herself potentially against Europe."

"Nothing will bring the two hemispheres together more rapidly than a demonstration from this side of the Atlantic of a sincere resolution to disarm. Nothing could be more beneficial to Anglo-American relations than an invitation, extended more than once, by Walter Hume Long, speaking officially as first lord of the admiralty, for completion with America, not to increase armaments, but to decrease them."

A GOOD MEDICINE FOR SPRING USE

Harsh Purgatives Should Be Avoided—A Tonic Will Restore Your Energy

Not exactly sick but not feeling quite well. That is the way thousands of people feel in the spring. It is a sign that the trying indoor life of winter has left its mark upon you. Easily tired, appetite fickle, sometimes headaches and a feeling of depression. Pimples or eruptions may appear on the skin, or there may be twinges of rheumatism or neuralgia. Any of these indicate that the blood is out of order, and these symptoms may easily develop into more serious troubles.

Do not dose yourself with purgatives as so many people do, in the hope that you can put your blood right. Purgatives gallop through the system and weaken instead of giving strength. Any doctor will tell you that this is true. What you need is a tonic that will build up the blood and nerves. Dr. Williams' Pink Pills can do this speedily and surely. This medicine enriches the blood, cleanses the skin, improves the appetite and makes tired depressed men, women and children bright, active and strong. As an example of the value of these pills we give the statement of Mrs. S. McBurnie, Tamarac, N. S., who says: "I have good reason to speak in the highest terms of Dr. Williams' Pink Pills. I was badly run down, gained weight and suffering from dizzy spells and weakness. In fact my condition was such that I was hardly able to do my housework. A friend advised me to try Dr. Williams' Pink Pills, and after using several boxes there was a noticeable improvement. I continued using the pills for some time longer and found that I had fully regained my old time health and strength and was able to do my housework with my usual feeling well and worn out as I did before I began using the pills."

Dr. Williams' Pink Pills can be obtained from any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Big Land Deal in Saskatchewan

A sale of farm land amounting to a quarter of a million dollars was effected by Charles Applegate, a real estate agent in Minneapolis, Minnesota, representing a number of Iowa men. The land is in Saskatchewan in the Humboldt district, one of the best mixed-farming districts in Western Canada.

DARTING, PIERCING SCIATIC PAINS

Give way before the penetrating effects of Sloan's Liniment

So do those rheumatic twinges and the loin-aches of lumbago, the nerve-inflammation of neuritis, the wry neck, the joint wrenching the ligament sprain, the muscle strain, and the throbbing bruise.

The ease of applying, the quickness of relief, the positive results, the cleanliness, and the economy of Sloan's Liniment make it universally popular. 35c, 70c, \$1.40—Made in Canada.

Sloan's Liniment keep it handy

Consolled
She lay in his arms and snuggled her head against his neck. . . . a rush of emotion surged through her. . . . tenderly he caressed her and she closed her eyes in delight.
"Poor kitty. Did I step on your tail?"

Charming Is Right

"What sort of a woman is she?"
"Charming. I was with her for two hours the other day, and in all that time she never once mentioned the high cost of living or the flu."

It Is Not Enough

to have the bowels move. It is more important to persuade liver, kidneys, skin, and bowels to act in harmony and against self-poisoning. BEECHAM'S PILLS act favorably upon all organs concerned in food-digestion and waste-elimination; they remove causes as well as relieve symptoms.

Saskatchewan Butter Meets With Favor in the United States

Within the last two weeks three carloads of butter have been forwarded to points in the United States from Saskatchewan. Two cars were sent from the North Battleford Creamery to Texas, and one from the Saskatoon creamery to Chicago. The returns for this butter are in excess of what can be secured in Saskatchewan, that is 63 cents a pound, which the creamery charges to the retailers, and which is sold at 75 cents a pound over the counter. With the exchange, as it is higher prices are realized for Saskatchewan butter across the line, and the province is getting one of the best advertisements possible from this product, which has ousted home products.

The creameries officials stated that the company was not making a practice of shipping butter out of the province, except the surplus production. From time to time, however, they were entering other markets to get an idea how the Saskatchewan product compares with the best of other lands, and in every case the company has learned that Saskatchewan butter stands at the top.

It is the intention of the officials to redouble their efforts to get Saskatchewan farmers to produce more milk and cream, for they averred that they could dispose of a carload of butter every day on the Chicago market if this was available. In fact, it was stated, there is no limit to the quantity which could be sold outside the province.

Anent Opportunities

How Young Men Have Risen to High Positions From Low Estates

There are people who keep saying until they believe it themselves that the time has passed when a young fellow can begin at the bottom of a big corporation and work to the top, but it is still true that a very large majority of highly paid executives have risen from the ranks. Of a number of men taken from random at a list of railway officials who are receiving salaries of fifty thousand dollars or more a year, one entered the service of the railway as axman, another as trainmaster's clerk, another as a telegraph operator, another as a fireman, and another as a warehouseman and brakeman. Most of them, moreover, began railroading while they were still in their teens. As many opportunities as ever before are waiting today for the men who can recognize and grasp them.—The Youth's Companion.

"BETTER LUMBER FOR HOME BUILDING"

THE IMPERIAL LUMBER CO. LTD.**JARROW.**

Mrs. McGee and Mrs. Smith left for Vancouver on Tuesday evening. Mrs. McGee's health has not been good for some time and it is hoped a change will be beneficial.

Ed Pete is still busy putting up buildings in Jarow.

Mr. Simons and family are moving onto the Hawthorne place which they purchased about a year ago. Mr. Simons is a Great War Veteran and formerly lived at Medicine Hat.

Miss Kerr recently from Edgerfon has taken charge of the Jarow school.

A dance was held at Batts last Friday evening but not many showed up on account of the poor roads.

A number of the young people journeyed to Kinsella a few days ago and enjoyed a well attended dance.

A report of the U.F.A. delegate to Calgary convention will be given at the next U.F.A. meeting in Jarow on the last Saturday in April.

The UFA are making an effort to get a rest room started in Jarow which is much needed.

The local returned men are trying to get a branch of the G.W.V.A. started here. There are about 22 men in this district.

Robt Deverick and Harold McDougall of Greenshields have purchased the business and stock of the Jarow Auto Supply Co. and will continue to handle all the various lines of machinery, engines, etc, together with a regular repair business and supplies. Mr. McDougall is a first class motor mechanic with several years experience and will be in charge of the local garage at all times. It is their intention to also run a crushing outfit, and take on tractor plowing by contract.

A great many farmers are seriously considering making a beginning in hogs again and we will try and give a short history of each breed in these columns, which may help some to decide which breed is the best suited for our markets and climate. It must be remembered that fancies do not set price of hogs but rather their ability to cut out a large percentage of prime bacon. We will leave it to each individual to make his choice from the information at hand and we hope every man who buys stock will get nothing but a first class article, as they eat less than a scrub. A ton of feed produces just as much pork with one breed as another so all we have to consider is the quality of the bacon produced from that feed.

THE BACON HOG.

In competition with the finest bacon in the world, Canadian bacon commands a price on the British market very close to the top. For this reason there should be no relaxation on the part of the breeder to adhere strictly to the bacon model in his breeding and feeding operations.

It cannot be denied that more skillful breeding is required in the production of the bacon hog; but it does not necessarily follow that it requires any more feed to produce one pound of gain. He should weigh at marketing not less than 170 pounds nor more than 220. The ideal is 180 to 200.

He should be smooth, trim, evenly developed, of great length, fair depth and moderate thickness. Described in detail he should conform closely to the following: Snout should be for the breed moderately fine and of medium length. A very short stubby nose is usually associated with a short, thick body; on the other hand a very long narrow snout and head, like a long face on a steer, generally indicates poor feeding qualities.

Ears should be fine in texture, firmly attached and erectly carried. A coarse and loosely carried ear indicates a sluggish temperament, delicate constitution, poor feeding qualities. Eyes are an excellent index of the health also the nervous temperament. Any departure from the normal in health will immediately be indicated by the eye. A wild flashing eye indicates a nervous temperament;

they should be large and prominent bright but placid, indicating health, docility, and good feeding qualities. Jowl light, trim and neat. A large flabby jowl is objectionable not only because it is of little value, but is usually associated with excessive fat and flabbiness throughout. Neck of medium length, and showing no tendency to arch, ontap. A pig with an arching neck will cut too thick over the top of the shoulders.

Shoulders light and smooth. They should be very compact on top, and no wider than the rest of the back. It is important that the shoulder blades be upright, it is not enough that a pig be long from tip to tip, he must be long from shoulder to ham. Some apparently lengthy hogs will cut a very short side of bacon because of the fact that the shoulders extends too far back into the side.

Breast of good width and full indicating a large chest with plenty of room for vital organ. Sometimes the apparent width of the breast is due to the faulty position of the fore legs, they being tacked on, so to speak, to the outside of the body. This conformation is always accompanied with a rough shoulder. Forelegs set well apart without going to the extreme already spoken of medium length and straight pastern upright and strong and moderately fine. The legs should be of fair length. A short legged animal is usually a short bodied animal.

Back of medium width, rising slightly above the straight line, and forming a slight arch from neck to tail. A sagging back indicates a lack of muscle or lean meat throughout. Sometimes a pig will show a drop in the back just behind the shoulder, which often means a weak constitution. It should be nicely rounded from side to side and of medium width. A broad flat back is usually associated with a short, thick, chunky conformation throughout. On the other hand the ribs should not fall away too abruptly from the backbone, known as "Herring Back".

Cold Weather means Hot Fires

 CANADA PERMANENT MORTGAGE COMPANY

Loin should be strong and full, but not unduly arched. Its should be of the same width as the rest of the back and well covered with flesh. Sides are the most valuable portion of the whole carcass it should be long, smooth and filled out even with the shoulder and ham; it should be deep enough to provide for constitution, but not so deep as to give an excess of thin flabby belly meat.

Heart-Girth should be full, indicating constitution; the fore flank should be well let down and full behind the elbow. The packer could not object to a slightly tucked-up appearance behind the fore-legs, but it is a fault that the breeder cannot afford to overlook.

Hind Flank well let down, giving a straight underline, which should be markedly trim and neat without a trace of flabbiness.

Rump should be the same with as the back, and dropping gradually from the loin to the tail, and nicely rounded throat.

Ham very trim and neat, tapering gradually to the back, heavily muscled and firm.

Flabbiness or folds are very undesirable.

Hind Legs firmly and squarely set with hocks well apart but not bowed outward. The bone should be clean, fine and strong.

IRMA G.W.V.A.

The annual meeting of the G.W.V.A. will be held in the Club room Saturday, April 17th, at 8 p.m. Election of new officers and executive, comrades please attend.

Pres. W. L. Mildon.
 R. O. Moore, Sec'y.

Jarrow 11.30 a.m.
 Metropolitan 2.30 pm
 A very interesting programme was given by the children and young people of the Batts appointment last Sunday afternoon. Miss Dorothy Lennox gave an object lesson "Faith, Hope and Love" Miss Norman Lennox, "For April Days", Master John Therou, "Easter and the Woods", Willie Therou "Easter Angels", Lily Therou "The Easter Bonnet", George Therou "The Breaking of the Day". All the pieces were well given and reflects credit to those who trained the children so well.

Do not forget
 to file your

Income Tax Return
 on or before the 30th of April, 1920.

Dominion of Canada

Department of Finance

ALL persons residing in Canada, employed in Canada, or carrying on business in Canada, are liable to a tax on income, as follows:—
